#### SHRUBS

Shrubs naturally vary in their habit of growth. Some large, some small, some medium. We shall in each case furnish the very best 2 year No. 1 plants.

\$.50 each except where otherwise stated.

Altbea. (Rose of Sharon) Red, pink or white. Very erect. Late summer.

Almond. Pink Flowering. Beautiful old fashioned plant.

Azalia Mollis. A Japanese variety ranging from yellow to orange. 12-18 in. @ \$2.00. Azalia Kaempferi. (Torch Azalia) Beautiful orange red flowers. 12-18 in.

Barberry. Red Leaved. 2-3 ft.
Beauty Bush. One of the newer varieties. Very profuse bloomer, with pink

flowers in early June.

Jewett City, Conu., April 12, 1934

All I want this year is the small order inclosed but be assured that whenever I buy trees it will be from you. It's impossible for me to describe the difference between your trees and those I brought from other nurseries before I knew about your nursery. Last year I must have picked a bushel of pears on a three year old tree—Beurre Bosc.

Yours very truly, David Berton

Butterfly Bush. Although of a woody nature, the growth kills back each winter to within a few inches of the ground, then making three to five feet the following summer, it being covered with purple or lavender sweet scented flowers which attract myriads of butterflies. Hence its

name.

Coral Berry. Pink flowers, followed by red berries.

Deutzia Gracilis. Dwarf, white. June.

Forsythia Spectabilis. One of the earliest and most profuse bloomers.

Honeysuckle, Pink Tartarian. Pink flowers. June. Followed by red berries in

late summer. Very attractive.

Honeysuckle, White Tartarian. Similar to the pink variety, but flowers

Honeysuckle, White Tartarian. Similar to the pink variety, but flowers white.

Hydrangea P. G. Large cone shaped flowers. Late summer.

Hydrangea Hills of Snow. White ball shaped flowers. July till frost.

Japan Quince. Brilliant scarlet flowers in May.

Japan Kerria Fl. Pl. A most striking bush with greenish bark and double yellow blossoms in May. 60c each.

Lilac. Purple.

Lilac. Named varieties @ 75c.

Madam Lemoine. Double, white.

President Grevy. Double, dark blue.

Souvenir de Ludwig Spaeth. Single, red.

Mock Orange Syringa. Cream colored, very sweet scented flowers. June.

Mock Orange Syringa Virginalis. An improved variety of the old fashioned Mock Orange. Larger, double flowers.

Spirea Anthony Waterer. Dwarf. Pink. June and July.

Spirea Tricocarpa. (Korean Spirea) One of the newer varieties similar to Spirea Van Houttei. blossoming later.

Spirea Van Houttei. Mass of white. Early June.

Snowball, Japan. White ball shaped flowers. Late May.

Snowberry. Pink flowers followed by white berries in fall.

Weigelia Eva Rathke. Crimson flowers. June.

Weigelia Rosea. Pink. Early June.

Weigelia Rosea. Pink. Early June.

Forest Hills, Mass., April 27, 1934

You will remember I bought quite a number of peach trees from you last year. Also plum and pear trees.

First, I want to say that they've all done very nicely, I don't believe that a single tree of the one hundred and fifty which I bought died.

Vorus very truly, Dr. A. I. Shadman

#### **EVERGREENS**

Space will not allow us to enumerate the varieties and sizes which we can furnish, but a special descriptive list of sizes and prices will be mailed

#### PEONIES

White, pink or red. \$ .35 each, 3 for \$1.00. We offer over 50 named varieties at varying prices. Special peony list on request.

### ROSE BUSHES

We handle only the best two year plants. They are not to be compared with department store "so called bargains".

#### CLIMBING ROSES - 40c Each

American Pillar. Single, rosy-pink, large flowers. Climbing American Beauty. Red. Dr. Van Fleet. Flesh pink. Dorothy Perkins. Pink.

Dorothy Perkins. Pink.

Excelsa. Crimson red.

Mary Wallace. Salmon pink.

Paul's Scarlet. Scarlet.

Silver Moon. Pure white, Yellow stamens.

White Dorothy Perkins. White.

Primrose. A new hardy, yellow climber with large double, canary yellow flowers in great profusion.

Scorcher. Very vigorous, and hardy, with handsome vermilion flowers, covering the about the great profusion and a fair reactivities in Autumn 1981. ing the plant in great profusion and a fair repetition in Autumn

HYBRID PERPETUALS (HARDY) - 50c Each

American Beauty. Red. General Jacqueminot. Red. Frau Karl Druschki. Pure white. Paul Neyron. Pink, very large.

Jashaway, Rhode Island, May 2, 1931

The apple trees and pear trees arrived last month in wonderful condition and we expect not more of your trees next year. Yours truly, Reginald Kenyon

#### TEA ROSES (EVERBLOOMING) - 50c each except as noted.

Columbia. Vivid pink.
Duchess of Wellington. Intense saffron-yellow, stained rich crimson.
Francis Scott Key. Brilliant crimson.
K. A. Victoria. Pure white. Very fine form.
Mme. Butterfly. Bright pink, apricot and gold.
Mrs. Charles Bell. Salmon, turning to pearly pink.
Mme. Edouard Herriot. Coral red, shaded yellow and scarlet.
Mrs. Aaron Ward. Yellow, sometimes shaded salmon, and rose.

Mms. Advance Herriot. Coral red, shaded yellow and scarlet.

Mrs. Aaron Ward. Yellow, sometimes shaded salmon and rose.

Pink Radiance. Carmine pink, yellow at base of petals.

Red Radiance. Dazzling, crimson scarlet.

Souv. de Claudius Pernet. Sunflower yellow.

President Herbert Hoover. Maroon, orange and gold, long pointed buds, rigid stems, and continuous bloomer.

Talisage. Orange red, golden yellow, and copper red.

rigid stems, and continuous bloomer.

Talisman. Orange red, golden yellow and copper red.

Charles K. Douglas. A very fine, bright red with scarlet undertone.

Betty Uprichard. Brilliant, copper red buds and semi-double, salmon pink flowers stained with copper pink on outside.

E. G. Hill. Large blossoms of deep maroon, velvety inside, glistening outside. Very fragrant.

Etoile de Hollande. Dark, velvety crimson.

Miss Rowena Thom. Brilliant, satiny pink, shaded with orange. Flame at

center.

Mrs. E. P. Thom. Fine long buds open into rich lemon-yellow bloom.

Gentlemen:
We note have about 1,500 trees bought from you since Spring 1925 in bearing. All true to name. So here is one satisfied customer. Yours very truly, Beyer Brothers

#### SOME NEWER VARIETIES

Blaze. (U.S. Plant Patent No. 10.) Sometimes called Everblooming Paul's Scarlet. Similar to this variety but continues to bloom all season until hard frost, \$1.50 Each.

Golden Climber. (Mrs. Arthur Curtis Jones.) (U. S. Plant Patent No. 28.)
A very hardy new yellow climber. Blooms over a long period even in late summer and fall. Semi-double blooms of pure gold on 15 to 18 inch stems.

\$2.00 Each.

New Dawn. (U. S. Plant Patent No. 1.) Vigorous free bloomer. Flowers similar to Dr. Van Fleet. \$1.50 Each.

Countess Vandal. (U. S. Plant Patent No. 38.) Long. pointed bud, coppery

Countess Vandal. (U. S. Plant Patent No. 38.) Long, pointed bud, coppery bronze, suffused with soft gold, \$1.00 Each.
 Nigrette. (U. S. Plant Patent No. 87.) The darkest of roses, appearing almost black from a little distance. Intensely deep maroon with blackish velvety sheen and deliciously fragrant. \$2.00 Each.
 Souvenir. (U. S. Plant Patent No. 25) Sometimes called Golden Talisman.

Deep golden yellow blooms with Talisman characteristics. A most excellent variety. \$1.00 Each.

New Haven, Conn., October 31, 1934

I was very much pleased with the grape vines and raspberry bushes you sent to me. Yours truly, Winfield S. Manship

Ten 100

\*†Baldwin. Large, red, winter apple. Known by all. The only one of the older varieties which the 1925 New England survey showed would not exceed 1925 production in 1935.

\*†Cortland. Very similar to McIntosh in flavor, Larger, darker red. ripens two weeks later, hangs to tree better, and well worth planting.

Red Strain Delicious. A so-called "Blood Red" strain of Delicious.

It colors early and should by all means be planted in preference to common

†Duchess. Striped red. Early August. Following Red Astrachau. Early McIntosh. A cross between McIntosh and Yellow Transparent.
Originated at Geneva Experiment Station, New York. The fruit is very similar to McIntosh in all respects, ripping after Yellow Transparent. Tree is a good thrifty grower and bears annually.

Fall Pippin. Well known Fall variety.

Gallia Beauty (Red Rome Beauty). Generally considered to be the best red strain of Rome Beauty, an early and annual bearer of late winter apples which retain a bright, shiny appearance until spring.

\*#Gravenstein. Large, striped, red.

\*\*Red Gravenstein. (Washington Strain) Originated in the State of Washington—said to be the very best strain of Red Gravenstein, similar to Gravenstein, but a much darker red.

\*\*Macoun.\*\* (Description by New York Fruit Testing Association.

Macoun. (Description by New York Fruit Testing Association. Geneva, New York.)

"Just as Early McIntosh advances the season for the McIntosh type of apple. Macoun produces a late crop of these red-skinned, white-fleshed, richly flavored, aromatic apples. The season of Macoun is from one to two months later than that of McIntosh with Cortland midway between. In shape, the fruits of Macoun are similar to those of McIntosh; the color is a darker red, less striped, and with a heavier bloom; the flesh is much the same in color, texture, flavor and aroma. The trees bear regularly and heavily This promises to be an apple of great merit coming in, as it does, long after all other McIntosh—like apples are out of season."

\*McIntosh. Known by everyone. Season of picking, last of September. Melba. One of the newer varieties. Similer to Duchess in season and markings, but better quality and larger.

Milton. (Description by New York Fruit Testing Association. Geneva. New York.)

Milton is a sister of Early McIntosh which ripens its crop a month

"Milton is a sister of Early McIntosh which ripens its crop a month later. Its main value is that it is a McIntosh type which ripens before McIntosh. The tree is vigorous but not as large as that of Early McIntosh. The fruits are covered with a very pinkish red and heavy bloom. The flesh is white, tender, crisp, juicy, and of McIntosh flavor and aroma."

\*|Northern Spy. Well known early Winter, red variety.

Opalescent. Very large, red apple. Fall.

Red Astrachan. Best, early red apple. August 1st.

Red Rome Beauty. See Gallia Beauty.

Red Spy. A sport of Northern Spy. Similar in all respects to Northern Spy except in coloring in which it much surpasses its parent, having a solid red.

\*†R. I. Greening. Fine dessert variety. Early Winter.

Rome Beauty. Late, red Winter apple. Very productive.

Roxbury Russet. Very late Winter russet apple.

\*†Stark. A late Winter apple. 7 year size only.

\*†Stayman. Winesap. Standard Winter apple in New Jersey. A good variety for late Winter in some sections of New England. Large, red apple.

\*†Wealthy. Fine filler variety. Often bearing fruit in the nursery at two years of age. Red. Late Angust.

†Wagener. Great filler variety. Bears young. Red, early Winter.

†Williams Red. Summer apple. Following Duchess.

†Yellow Transparent. The first early apple of importance. Fine filler variety.

Hyslop Crab. Very productive. Red.

Waltham, Mass., March 28, 1934

Venucinen:
Your trees have always been very satisfactory, and I trust that this lot will be up to your usual standard.

#### PEACH TREES

Our observation has been that the planting and prices of peaches (fruit) fluctuates in about 10 year cycles. There was heavy planting of peaches previous to 1925 which has been reflected in lower prices in the fruit since 1925. With little planting the past few years, and the very heavy cutting out of old orchards following the severe weather of the winter of 1934, our belief is that the production of peaches in the North Eastern part of the United States is now so much below normal, that those who plant now will produce on the up cycle of prices over the next ten years.

For Spring 1935, we offer peach trees, inst as usually offered, that is

produce on the up cycle of prices over the next ten years.

For Spring 1935, we offer peach trees, just as usually offered, that is one year tops and two year roots, also a lot with one year tops and three year roots. We ran the tree digger under this latter block in the Spring of 1934, thus cutting the roots, which has given an unusually nice lot of fibrous roots. The only difference in appearance of these two lots of trees is that those which have three year roots have somewhat larger butts and root systems. We show photos of both lots of trees. Peach tree production next year will be very short. Plant Spring of 1935, save money on trees and be ready to take advantage of the higher prices of fruit which is most certainly coming.

## TIME OF RIPENING IS FOR CONNECTICUT CONDITIONS

Sunbeam. August 1st. Medium size, fine flavor, white with red check. We r a very limited quantity in  $\frac{1}{16}$  and  $\frac{6}{16}$  only.

Greensboro. August 1st. Medium size. White flesh. Very productive.

Mikado. (June Elberta) August 1st. A very handsome roundish variety. w flesh-excellent quality.

Buttercup. August 3rd. Very similar to Mikado, but slightly larger. Marigold. August 8th. Yellow, semi-free, ripening at a time which is very desirable, filling a season where there has usually been a slight break.

Oriole. August 10th. Nearly free, yellow and starts to ripen just ahead of Golden Jubilee. Carman. August 15th. Medium to large. White, Very hardy variety.

Cumberland. August 15th. Practically free, white flesh, dark red coloring, elongated in shape, good size. Best white of its season. Golden Jubilee. The most outstanding introduction of the New Jersey Experiment Station. A block laden with rich golden yellow, red blushed fruit is a handsome sight. Similar to Elberta in general appearance, but a brighter golden yellow, slightly smaller size and much hetter flavor.

Eclipse. August 25th. Medinm size, yellow freestone, red cheek. South Haven. August 25th. A very large yellow freestone of Michigan origin. Tree is thrifty and productive.

LIBRARY A. . . HILVED

🙀 JAN 23 1935 🖈

U. B. Department of Agrica-

U. S. POSTAGE

PAID Wallingford, Conn

U. S. DEPARTMENT OF ACRICULTURE

**Belle of Georgia.** September 1st. Probably the best known and most popular of white varieties.

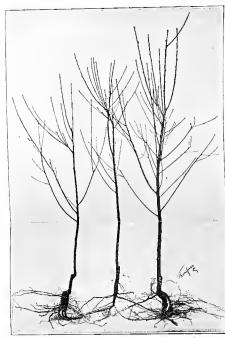

Elberta. September 4th. Known to all. King of Peaches.

J. H. Hale. September 8th. Its extra large size, rich golden yellow color and handsome red cheek, fine flavor, and general attractiveness place it in a class by itself. For several years, Hale on our roadside stand have brought from 100 to 150% more than our best Elbertas.

Brackett. Very similar to Elberta, following immediately after this

Lizzie. September 20th. Best of its scason. Similar to Elberta, being a chance seedling of that variety. Not quite as much red, but otherwise similar. This variety and Brackett fill a season which has been badly neglected the past few years, and come at a time when peaches have been selling at about 100% more than earlier old time varieties.

Peach Special No. 1. For those wishing a yellow freestone peach with handsome red coloring and shape of Elberta to follow immediately after Golden Jubilee, we offer Special No. 1. The original tree is a seedling standing in sod uncared for, but its production has been such that we have propagated from it, planted in our own orchards and have a few for sale. We have not attempted to introduce the variety nor to give it a name, so when ordering, please specify Peach Special No. 1.

Comparative sizes of our fe, 78 and fe Peach Trees. 2 year roots

Monmouth, Maine, April 18, 1934 Gentlemen: I set a few of your trees three years ago, They had a wonderful apportunity and they took advantage of it. Respectfully yours, George Frost

#### Please do not confuse us

We have no connection with any other "Barnes" company. Members of our company are:

Norman H. Barnes

James P. Barnes

#### TO OUR FRIENDS

We wish to thank our customers for their business given to us during the past year. During the past five or more lean years, when the public in general have been fighting for an existence, we have been able to carry on and although our production has been less, we have always looked for quality and reliability in our stock and what we are offering this year is no exception, whether fruit trees or ornamental nursery stock.

There is a very decided shortage of fruit trees in the country, due both to drought in many sections, and to the fact that many nursery men either have been forced out of business or at least have greatly curtailed their production. Therefore, without any hesitation we suggest that if ever it is necessary to order early, it is **NOW** and for the next two years. The shortage will not reach its peak for at least two years more. Once more, **ORDER EARLY** and have the stock reserved intil you wish to have it shipped in the spring

#### STATEMENT OF INSPECTION

Amherst, Mass. October 8, 1934

#### TO WHOM IT MAY CONCERN:

This is to state that I have examined for trueness to name all the saleable apple stock of Wallingford Nurseries of Wallingford, Connecticut now growing near Wallingford, Connecticut and as the trees now stand in the nursery row, all trese are, to the best of my knowledge and belief, true to name.

J. K. Shaw, Research Professor of Pomology

#### NON-WARRANTY

We strive to avoid mistakes, but in the event that any nursery stock sold by us should prove intrue to the label under which it is sold, provided notice and proper proof are furnished to the seller, the seller shall, at the option of the buyer, either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price. But in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales or agreements to sell are made subject to shortage of nursery stock from fire, frosts, drought, or other causes beyond control of the sellers.

#### APPLICATION OF PRICES

Customers may select 5 of any kind (such as 5 peach) at the 10 rate, 50 at the 100 rate, 500 at the 1000 rate.

5% discount may be deducted on all orders where the total amount is remitted with the order and this is sent before April 1st.

#### SIZE OF TREES

Caliper or diameter governs the size of all fruit trees except 1 year apple. Height is only approximate.

Holliston, Mass., February 2, 1934

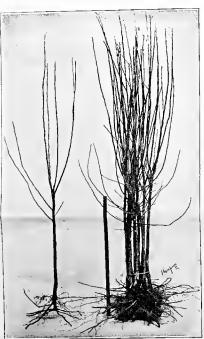

Gentlemen: We have been buying trees from you for the past three years. We are sory that we did not start buying back in 1925 when we started developing our orchards here, for you certainly live up to your local reputation for fair and square dealing.

We shall certainly buy your trees in the future. You surely have used as O. K.

Gratefully yours. Crestmere Farm, J. W. Hulbert, Supt.

#### STANDARD APPLE TREES ORDER EARLY

Permanent apple trees are usually planted about 40 feet apart. Some growers prefer more, some a little less. Some also use fillers, such as peach trees, or early bearing varieties of apples making them 20 feet apart or if planted only in the center of the 40 foot space the distance will be 28 feet. As the trees begin to crowd, taking out one half will leave the 28 feet apart and later when the remaining fillers are removed, the distance will be 40 feet. Thus an income can be had for many years, when the permanent trees will need only a portion of the land.

Two year old to in. and up Baldwin Trees

For home planters who wish an unusually large tree, we offer seven year old, twice transplanted trees in the varieties designated. These two transplantings have made possible a wonderful root system so that the trees may be transplanted just as safely as small trees.

There is now a very acute shortage of fruit trees in the country, probably more so than has existed for the past thirteen years. Our opinion is that this shortage will not reach its peak for two years more. If it ever is necessary to order early, it is now. Don't delay.
